

We're changing the way we organise and deliver our academy improvement programme.

We know we have the knowledge and experience within our Trust to keep improving our curriculum and pedagogy so we can improve outcomes for all our pupils.

We all own the responsibility for making sure every pupil achieves the best they can, whichever academy they attend. This is our collective endeavour. We strive to work together in ways which enable our pupils to develop agency and learn how to use it as active members of our society

We are organising our academies into Education Development Partnerships, each led by a dedicated Leader of Academy Improvement.

They will work with leaders across the Partnership to broker and provide the support we need to meet the challenging targets we've set for our pupils. We will do this by facilitating academy improvement activity across our Partnerships, including:

- Coaching and mentoring
- Training and CPD
- Focused reviews of curriculum areas
- Curriculum design
- Understanding of effective pedagogy
- Analysis of outcomes and improvement planning
- Timetabling
- Leadership development
